

# **Lithium battery energy storage spot welding machine**

## Overview

---

How long does a battery spot welder last?

U.S. Solid services your battery spot welder to be free from defects in materials or workmanship under normal use and service for one year from the date of original purchase. The new welder is equipped with two super capacitors for energy storage and a stable power source for pulse spot welding.

What is a battery spot welder?

This kind battery spot welder is mainly used for 18650, 26650, 32650 cylindrical battery, NI-MH battery (nickel-metal hydride battery), Nickel cadmium battery and EV Lithium battery pack Ni tab welding. The equipment has stable performance, reliable welding quality, compact and reasonable structure, small size and large power.

What is the maximum pulse welding power for lithium iron phosphate battery?

The max pulse welding power can be up to 12 kW, ensuring you a reliable welding effect. Application Welding of lithium iron phosphate battery without nickel conversion carried out with nickel aluminium composite sheet. Welding lithium iron phosphate with pure nickel sheet. Used in batteries, metal hardware, electronic components spot welding work.

What is a multifunction battery welding machine?

This multifunction battery welding machine is a key piece of portable equipment to use for welding batteries. This battery welding machine features an intelligent chip which automatically stops the spot welder if it overheats during use. This intelligent chip is a fantastic safety feature, prolonging the life of your portable soldering station.

How many rows can a spot welder Weld?

High-power spot welding + charging integrated spot-welding machine 3.8KW-

-pro spot welder has been designed to weld up to 4 rows of 18650 batteries quickly and efficiently. It is supplied with a welding pen and foot pedal. This multifunction battery welding machine is a key piece of portable equipment to use for welding batteries.

Can lithium iron phosphate battery be welded without nickel conversion?

Application Welding of lithium iron phosphate battery without nickel conversion carried out with nickel aluminium composite sheet. Welding lithium iron phosphate with pure nickel sheet. Used in batteries, metal hardware, electronic components spot welding work. Yes! I am interested ₹ 33360 / Piece
