Overview

How a Bess project is promoting energy storage in Vietnam?

Encouraging domestic enterprises to invest in new technologies will promote the growth of the energy storage industry in Vietnam. Investment in BESS projects in Vietnam is attracting the attention of international partners due to the country's strong potential for RE development.

How are re and Bess projects funded in Vietnam?

FIGURE 18. Domestic funding and capital sources for RE and BESS projects in Vietnam such as Vietcombank, BIDV and VietinBank, provide concessional loans for RE projects, often backed by government guarantees or support.

How can international investors support re & Bess projects in Vietnam?

International capital: International financial institutions, such as the World Bank, the Asian Development Bank (ADB) and green investment funds, are ready to provide financial support for RE and BESS projects in Vietnam. International investors can leverage these funding sources to mitigate financial risks.

Is Vietnam accelerating the development of re and Bess?

A detailed BESS analysis shows that Vietnam is accelerating the development of RE combined with BESSs to optimise energy use and ensure the stability of the power grid. The government has issued policies to encourage BESS deployment, as outlined in the PDP VIII, with the goal of developing a storage capacity of 300 MW by 2030.

Can Bess be integrated into Vietnam's power grid?

In an effort to facilitate the integration of BESS into Vietnam's power grid, the Electricity and Renewable Energy Authority (EREA) of the Ministry of Industry and Trade recently hosted a technical workshop in collaboration with GEAPP.

Why do businesses need a Bess system in Vietnam?

BESSs not only enable businesses to store surplus energy during low-demand periods but also alleviate pressure on the grid during peak hours, optimising operating costs. Currently, the BESS market in Vietnam is nascent, with significant limitations in terms of technical expertise and infrastructure.
