

## Mozambique's energy storage preferential policies

## Overview

---

Does Mozambique have a biofuel policy?

A National Policy and Strategy for Biofuels was approved in February 2009 which focuses on ethanol from sugarcane and sorghum and coconut and jatropha for biodiesel. This policy has led to hundreds of millions of dollars in investment plans in ethanol and biodiesel in Mozambique.

What are the national strategies for Mozambique?

Law n.º 11/2017, of September 8 th. The central goal of national strategies in Mozambique is to achieve countrywide energy access by 2030. The Integrated Power Sector Master Plan from EDM is the main policy for Mozambique. It has a set goal to increase installed capacity to 6,001 MW by 2030 and 20% integration of renewable energy in the grid.

What is Mozambique's integrated power sector master plan?

The Integrated Power Sector Master Plan from EDM is the main policy for Mozambique. It has a set goal to increase installed capacity to 6,001 MW by 2030 and 20% integration of renewable energy in the grid. The institutional, financial and technical approach to reach these goals is defined by the National Electrification Strategy (ENE) .

What is Mozambique's rural electrification strategy?

Mozambique's state-owned utility, EDM has developed a strategy as well (often referred to as the Rural Electrification Strategy) to ensure the development of the energy sector in Mozambique and drive its growth as an important market in the Southern African region . These initiatives are based on Sustainable Development Goal (SDG) 7.

Why is energy important in Mozambique?

The energy sector is key to the country's economy already today, since energy exports make up a large share of total foreign exchange earnings.

Moreover, the availability of cheap electricity is one of the main reasons for the significant foreign direct investment in energy-intensive industries in Mozambique.

Does Mozambique have electricity?

Mozambique has undertaken significant efforts in recent years to electrify the country. The electrification rate has increased from 5% in 2001 to 29% in 2019 . In 2022, it increased to 44% from 34% in 2020. Access to electricity, however, remains low and is mainly focused on urban areas.

## Mozambique's energy storage preferential policies

### Policy Framework and Energy Access Strategies in Mozambique

In Mozambique, around 40% of people have access to electricity, through the grid or mini/off-grid systems. The government has promoted solar PV solutions in rural areas, reporting that 700 ...

## Mozambique renewable energy: Unique 2030 Goal Emerges

3 ??? Mozambique is charting an ambitious course towards a sustainable energy future, focusing on renewable energy projects to reduce its reliance on fossil fuels and significantly ...

### Supporting Climate Policy and Energy Transition in ...

The project supports Mozambique's commitment to setting ambitious, realistic and data-based climate targets for the 2025 NDC Update Report, while promoting long-term climate resilience ...

## What are Mozambique's energy storage policies

Making the most of Mozambique's energy transition We are excited about the changes

unfolding in Mozambique's energy sector. The traditional model dominated by state-owned power plants ...

## How is the energy storage market in Mozambique? , NenPower

This market provides an excellent opportunity for sustained economic growth and the achievement of energy security and environmental sustainability objectives. Without a ...

## Mozambique: Energy Policy , SpringerLink

The policy for energy has focused on prioritizing the extension of the national grid to rural, economically disadvantaged citizens with the limited resources that have been ...

## Trade Policy Review Body TRADE POLICY REVIEW
