

Ndrc releases new policy on shared energy storage

Previously, in February 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued Document No. 136, explicitly stating that energy storage configuration should not be a prerequisite for the approval of new energy projects, ending.

Previously, in February 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued Document No. 136, explicitly stating that energy storage configuration should not be a prerequisite for the approval of new energy projects, ending.

According to Wechat Official Account @escn518, in the short four months of 2025, a series of new policies have been successively released at the national and local levels, ushering in an unprecedented "policy storm" for China's new energy industry and accelerating the transformation of the energy.

On February 9, China's National Development and Reform Commission (NDRC) and National Energy Agency (NEA) jointly published the Notice on Deepening Market-Based Reform of Renewable Energy On-Grid Tariffs to Promote High-Quality Renewable Energy Development. Hereafter referred to as the Notice, or,

In just four months into 2025, the energy storage sector has experienced a series of significant policy updates. The combined effects of Document 136 and Document 394 essentially aim to eliminate excesses in the energy storage industry, marking a critical transition from policy-driven growth to.

Last week, the National Development and Reformation Commission (NDRC) published the Notice about Further Promoting New Energy Storage Systems to Participate in Power Market and Dispatch Operations
 国家发展和改革委员会 2022 年 475 号。In China, new energy storage doesn't include pumped.

China's new energy industry has ushered in an unprecedented "policy storm," which has also accelerated the transformation of the energy storage industry from "policy-driven" to "market-driven." Following Document No. 136, local

government policies in various provinces have shown the following.

That's where China's National Development and Reform Commission (NDRC) steps in with game-changing new energy storage policies announced this March. These regulations aren't just bureaucratic paperwork – they're reshaping how we store solar power for cloudy days and wind energy for calm nights [3].
