

Off grid battery system tender price in Romania 2026

Overview

Will Romania re-launch a battery storage tender in 2026?

Romania's energy ministry has re-launched a competitive tender for battery storage projects, seeking to have at least 240MW/480MWh of energy storage facilities up and running by mid-2026. Meanwhile, another tender for the construction of an industrial chain for battery storage and solar panels will.

How much does Romania spend on battery energy storage in 2026?

Romania has also earmarked EUR 199 million to support new capacities for the production and recycling of batteries and solar cells and panels. With this reopened bidding, the ministry aims to see the two-hour duration battery energy storage system (BESS) facilities up and running by mid-2026. The budget for the BESS projects is EUR 79.6 million.

What are the energy security and grid resilience tenders?

The tenders aim to strengthen its energy security and grid resilience in the face of a continued increase in the share of renewable energy sources by adding at least 240MW/480MWh of battery storage capacity and at least 2GW of battery production, assembly and recycling capacity.

How many MW of battery energy will be available in 2026?

Project objective: to bring online, by 30 June 2026, at least 240 MW (or 480 MWh) of battery energy storage capacity and at least 2 GW per year of battery production, assembly and recycling capacity. In addition, a minimum of 200 MW/year of PV cell or panel production and/or assembly and recycling capacity is planned to be in operation.

How many batteries will be made online in 2026?

At least 2GW of annual production, recycling or assembly of batteries per year will be brought online by that same 2026 mid-point, the government hopes.
