

Office building energy storage project financing options in Luxembourg 2030

Overview

What projects does Luxembourg participate in?

Luxembourg participates in projects financed by the EU Innovation Fund, which supports innovative industrial initiatives. For example, projects related to energy storage, recycling and carbon capture and storage (CCUS) are being developed to reduce emissions in energy-intensive industries.

Why is Luxembourg a leader in sustainable finance?

Luxembourg is a leader in sustainable finance with financial instruments for clean energy projects, pioneering this type of bond. Luxembourg is a leader in sustainable finance with financial instruments for clean energy projects, pioneering this type of bond.

Will Luxembourg expand offshore wind power capacity by 2030?

Within wind power initiatives, Luxembourg is collaborating on cross-border projects in the North Sea to expand offshore wind power capacity to 120 GW by 2030. within wind power initiatives, Luxembourg is collaborating on cross-border projects in the North Sea to expand offshore wind power capacity to 120 GW by 2030.

Will Luxembourg achieve net zero emissions by 2050?

Furthermore, in February 2024, Luxembourg signed the Net-Zero Industry Act agreement and committed to achieving net zero emissions in national government operations by 2050.

Does project finance apply to energy storage projects?

The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects. Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project.

Will a tax credit be available for energy storage projects?

However, with the passage of the Inflation Reduction Act of 2022, tax credits are now available for standalone energy storage systems, and thus lenders may be willing to provide bridge capital that is underwritten based on the receipt of proceeds from an anticipated tax equity investment, similar to renewable energy projects.
