

Office building energy storage tender price in Greece 2026

Overview

The bidding price for projects is capped at 145,000 euros per MWh, and the tender is open to standalone battery storage proposals with four-hour storage capacities.

The bidding price for projects is capped at 145,000 euros per MWh, and the tender is open to standalone battery storage proposals with four-hour storage capacities.

Greece has officially launched its third tender for battery energy storage capacity, aiming to allocate 200 MW of projects eligible for subsidies of up to 200,000 euros per MWh. This tender marks the final phase of Greece's ambitious 1 GW program, which is designed to support the development of.

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years. The submitted bids were capped at €115,000/MW per year, with the lowest.

Before the end of 2024, Greece intends to provide subsidies for standalone battery projects of 200 MW in total via the third auction. The Ministry of Environment and Energy issued a decree determining the available operating power quota. Together with the support awarded in the first two auctions.

The Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) has launched the country's third auction for standalone, grid-scale, front-of-the-meter battery energy storage systems. The auction seeks to award 200 MW of battery storage projects, 100 MW less than initially announced when the 1.

The Greek government has opened for applications a programme that will subsidise businesses to install energy storage systems, either as part of new solar projects or as an addition to existing plants. Battery energy storage systems (BESS) License: CC0 1.0 Universal (CC0 1.0) Public Domain.

Greece has launched its third and final tender under a 1-GW program to

support standalone battery energy storage systems (BESS), aiming to allocate 200 MW of capacity with available subsidies of EUR 200,000 (USD 217,920) per MWh. This move, approved by Greece's Regulatory Authority for Energy. What is the Greek energy storage tender?

The tender is part of the country's 1 GW energy storage auction program. The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program.

Does Greece need a third energy storage tender?

Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of €49,748/MW per year. To conclude its energy storage auction program, Greece needs to run a third storage tender to account for the remainder of the program's 1 GW of capacity.

How many MW of new battery storage capacity does Greece have?

The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh).

What is the quota for battery energy storage in Greece?

The quota for the latter is 50 MW. The program is part of the just transition efforts within Greece's coal phaseout, currently scheduled to be completed in 2026. Grants for the capital expenditure or capex for the battery energy storage systems (BESS) are set at EUR 200,000 per MW.

How much does an energy storage auction cost in Greece?

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years. The submitted bids were capped at €115,000/MW per year, with the lowest successful bid set at €44,100/MW per year.

How often should energy storage projects be completed in Greece?

Investors will be expected to submit progress reports every three months to ensure timely construction. Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of €49,748/MW per year.
