

On grid solar storage EPC turnkey quotation per 8MW 2030

Overview

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

What happens after a solar installation project is completed?

Once your solar installation project is complete and a quality inspection is finished, your solar system will be ready to hook into the grid and begin to transfer energy. Every component of your solar grid is tested, verified, documented, and maintained to perfection.
