

Recommendation of large- capacity household energy storage water heaters

Overview

DOE is confident in the industry's ability to ramp up capacity to produce the volumes necessary to support the heat pump water heating market that will be required by the amended standards, as demonstrated by a major manufacturer signing on to the joint stakeholder recommendation.

DOE is confident in the industry's ability to ramp up capacity to produce the volumes necessary to support the heat pump water heating market that will be required by the amended standards, as demonstrated by a major manufacturer signing on to the joint stakeholder recommendation.

— The U.S. Department of Energy (DOE) today finalized Congressionally-mandated energy-efficiency standards for a range of residential water heaters to save American households approximately \$7.6 billion per year on their energy and water bills, while significantly cutting energy waste and harmful.
