

Residential ESS cost breakdown in Luxembourg 2030

Overview

What is the global residential ESS market segmented based on?

The global residential ESS market is segmented based on technology type. Based on technology type, the market is segmented into li-ion batteries, lead-acid batteries, and other technologies. Lithium-ion batteries held major market share based on technology.

How much does it cost to live in Luxembourg?

Housing remains the largest expense for most residents. The demand continues to outpace supply, especially in and around Luxembourg City. Buying property is also expensive. The average price per square metre is around €11,000 in the city and €7,500 outside.

Why has the supply of residential Bess increased in 2024?

At the same time, the supply of residential BESS has increased because of the appearance of Asian players on the large and comparatively attractive European market; our research shows that European residential BESS installation represents 71 percent of global installations in 2024.

How much do energy alternatives cost in Europe?

Furthermore, rising interest rates and the general decline of the European economy mean consumers are more conservative when it comes to making investments in energy alternatives, such as solar photovoltaic (PV) and BESS, which can easily cost up to €30,000.

How can European residential Bess OEMs capture additional revenue?

European residential BESS OEMs can capture additional revenue by first ensuring that manufactured BESS products meet the criteria of sales professionals and installers and then by focusing on building trusting relationships.

How much does Bess cost in Europe?

In early 2024, the price of residential BESS offered to end consumers in Europe ranged widely, from €400 to more than €1,200 per kilowatt-hour (kWh) (Exhibit 2). Historically, European OEMs built trust-based brands by highlighting their “made in Europe” status and rode the first-mover wave over the past ten years.
