

Residential ESS project financing options in Ghana 2030

Overview

How does the bank of Ghana calculate housing demand?

Using a similar system to calculate housing demand, the Bank of Ghana categorises houses with 8.7 or more persons to be overcrowded and promotes an ideal limit of one household per house. The basis of this approach is to set a desirable ceiling for the number of occupants per room.

What is an affordable house in Ghana?

'An affordable house in Ghana is a house whose cost ranges from GHS 100,000 to GHS 200,000, taking into consideration people's incomes and the feasibility of the construction costs. A house is only affordable because people have the money to buy, or can access a mortgage to buy, the property.'
