

Residential ESS project financing options in Greenland 2026

Overview

Who is Greenland invest?

Greenland Invest was founded in 2010, with a strong team of strategic knowledge providers, to give maximum scalability to meet all clients' needs. Offering opportunities, experience and insights of high quality and clarity. Together we provide fast and strong results with a clear focus. Housing, Infrastructure and Mineral Resources.

How many projects does Greenland water company have?

The company is privately held and has project portfolio of 20+ projects, in areas such as FMCG, energy, seafood and innovative water solutions for the growing international water market. Because of the diversity of the portfolio, we are in daily contact with both private and public entities within and outside of Greenland.

How do green loan discounts work in the Netherlands?

The Netherlands offers “green loan discounts” through the RVO agency for projects meeting specific criteria. These discounts, which can be substantial, are calculated on a per-project basis and consider factors like whether it is a new build or refurbishment, construction materials used, project size, and the final energy label achieved.

How can governments encourage a shift to sustainable project financing in real estate?

By combining stringent regulations and attractive financial incentives, governments can encourage a shift towards sustainable refurbishments, balancing reuse with achieving the best possible environmental performance. The shift towards sustainable project financing in real estate is gradual but inevitable.

How do you manage ESG in a project?

Embrace Future Trends: Stay informed about emerging ESG trends to “future-proof” assets. Incorporate flexibility into project design to adapt to future requirements. Transparency and Communication: Clearly communicate the project’s ESG approach, including its potential for future adaptation.

What is the financing environment for projects?

The financing environment for projects is in the midst of a profound change. Increasingly stringent environmental and social impact assessments are making it more difficult to secure funding for “brown” or “stranded” assets. Financiers are particularly cautious about these projects due to several risks:
