

Rooftop solar storage tender price in Belgium 2026

Overview

How will the EU solar rooftop standard affect public buildings?

Public buildings like schools and hospitals will be particularly empowered by the EU Solar Rooftop Standard, which ensures they will benefit from solar-reduced energy expenses and dependence on fossil fuels.

When does the EU solar rooftop standard apply?

The EU Solar Rooftop Standard applies to new non-residential and public buildings from 2027, to existing non-residential buildings undergoing major renovations by 2028, to new residential buildings from 2030 and on all suitable existing public buildings by 2031.

Will the EU rooftop solar standard drive more rooftop solar capacity?

According to our analysis, the EU Rooftop Solar Standard within the EPBD could drive the installation of 150 to 200 GW of additional rooftop solar capacity in the EU between 2026 and 2030. · Critically, the Solar Rooftop Standard will unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks.

How big is rooftop solar in Europe?

Total rooftop solar capacity in Europe stood at more than 170 GW at the end of 2023 and is expected to grow to 355 GW by the end of 2027. In addition to the obligatory solar installations under the Solar Standard, the growth of rooftop solar on homes is also likely to increase, as citizens seek to shield themselves from fossil price volatility.

What is the solar rooftop standard?

The Solar Rooftop Standard will most importantly unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks. Certain buildings such as agricultural and historic structures may be excluded. Osenberg continues: “Rooftop PV needs to be the gateway to smart

electrification.

Will rooftop solar become a standard?

Jan Osenberg, Senior Policy Advisor at SolarPower Europe (he/him) said: “Like the essential integration of smoke detections years ago, this new law propels rooftop solar toward becoming the standard. More buildings, businesses, and citizens will have access to clean, renewable, economical solar energy.”
