Overview

Will Russian energy storage firm Renera invest in EV batteries?

June 23, 2023: Russian energy storage firm Renera says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

Should Russia create an infrastructure for EV charging stations?

Russia must also “create an infrastructure for charging stations” for EVs, he said. Rosatom announced on November 23 that it had established a new subsidiary — Renera — dedicated to the manufacture of energy storage systems.

Will Russia produce a prototype battery by the middle of the year?

The move follows Russia’s claim last month that it will have produced prototype batteries by the middle of the year.

Which storage batteries are best for autonomous energy systems?

- In the Russian context, FLA and OPzS storage batteries are the best option for average-sized and more powerful autonomous energy systems with renewable energy sources. They are less costly than OPzV with similar capacity and are subject to high-current discharges.
