coverage of Poland Government Solar Energy Tenders, our platform ensures businesses can confidently participate in tenders published by trusted agencies. Will energy storage subsidy programs accelerate Poland's energy transition?

The development of energy storage subsidy programs in 2024-2025 has great potential. The planned activities will accelerate Poland's energy transition, supporting the development of technologies and the creation of new jobs in the energy sector. Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid.

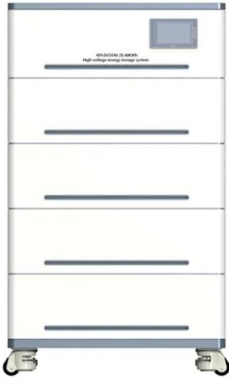

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

How much money will Poland receive from the modernization fund?

Funding for the program comes from the Modernization Fund (FM), which underscores the importance of the project for modernizing the energy system. By 2030, Poland could receive about 60 billion zlotys from the FM for energy transition goals. The call for applications runs from June 17, 2024 to June 16, 2025, or until funds are exhausted.
