

Singularity new energy storage ranking

Overview

Despite challenges in late 2023, such as safety regulation updates and adjustments in electricity pricing mechanisms, Singularity Energy retained its top position, also ranking first in the 2024 annual domestic user-side energy storage system shipment list published by CNESA.

Despite challenges in late 2023, such as safety regulation updates and adjustments in electricity pricing mechanisms, Singularity Energy retained its top position, also ranking first in the 2024 annual domestic user-side energy storage system shipment list published by CNESA.

Get free access to financial stability insights and Altman-Z scores of over 40+ Energy Storage manufacturers to make informed decisions in the energy storage market.

Singularity Energy, focused on distributed energy storage, has shown remarkable resilience, maintaining its position at the top of the market and winning the title of China's leading commercial energy storage provider for two consecutive years. First Revolution: Defining the Standard for Commercial.

On April 10, 2025, the 13th Energy Storage International Conference and Expo (ESIE 2025), jointly hosted by the China Energy Research Society, the China Energy Storage Alliance (CNESA), and the Institute of Engineering Thermophysics, Chinese Academy of Sciences, was grandly held at the Beijing.

InfoLink Consulting has released its 2024 global energy storage system (ESS) shipment ranking, based on its Energy Storage Supply Chain Database. In 2024, global ESS shipments continued to grow, reaching 240 GWh, up over 60% YoY. AC side: Leading manufacturers between China and the U.S. maintain.

On April 10, at the grand opening of the 13th International Energy Storage Summit and Exhibition (ESIE2025) held at the Beijing International Convention Center, Singularity Energy once again reached the pinnacle of the industry by

receiving two prestigious honors: the Top 1 Domestic User-side.

According to InfoLink's Global Energy Storage Supply Chain Database, global energy storage cell shipments totaled 314.7 GWh in 2024, up 60% YoY. The market showed a trend of early decline followed by a rebound, with 4Q24 shipments increasing 19.7% QoQ, reaching the annual peak for 2024. In 2024.
