Will South Africa invest \$30 billion in New wind and solar?

South Africa's 2020-30 allocation of 14.4GW of new wind capacity and 4GW of new PV capacity under the 2019 Integrated Resource Plan (IRP) presents an investment opportunity for \$30 billion into new wind and solar assets by 2030. This would represent a 50% increase in investment into wind and solar compared to the previous decade.

How much solar power will South Africa produce by 2030?

Approximately 30GW of solar and 9GW of wind installed by 2030, producing 59TWh of wind and solar power (compared to an estimated 61TWh in IRP). This is more solar and less wind than the IRP allocation, but reaches similar generation volumes. Source: IRP 2019, South Africa NDC, BloombergNEF.

Are solar capital advances a good option in South Africa?

The old-fashioned nature of bank loans in South Africa has led to a wave of alternative lenders who provide solar capital advances on much better terms. Lula's Capital Advance is a great example.

Should you invest in a solar system in South Africa?

For a lot of South Africans, the upfront investment required for a solar system can be a barrier. That's where the help of finance options comes in, allowing you to save money, without having to pay the full cost right upfront.
