Clean Horizon releases its 2025 energy storage price forecast for Italy, covering MACSE auction details, business models and revenue streams.

At the end of February 2025 9.1 GWh of authorised stand-alone capacity on the HV grid was eligible for auction participation. Applying the 80% rule to this volume, the national auction quota would be 7.3 GWh, assuming authorised capacity remains the same. However new projects reaching authorisation.

Italy's first solar auction under the transitional FER X incentive scheme drew 17.5 GW in project proposals and an additional 2.87 GW in wind bids, according to state-run energy agency Gestore dei Servizi Energetici (GSE). From pv magazine Italy The first solar energy auction under Italy's new.

The EU's approval in December 2023 of Italy's €17.7 billion aid to support an energy storage investment plan has kept boosting the energy storage market with prospect to add 9 GW/71 GWh of long-duration energy storage by 2030. This will be a crucial step for Italy in accelerating its ambitious.

Underpinning MACSE, or Meccanismo di Assegnazione Centralizzata per la Sostenibilità Energetica, is an ambitious plan to boost renewable energy integration and support up to 50GWh of energy storage by 2030 – a move to ensure Italy's energy security and sustainability. First up is the lithium-ion.

Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of 2025. Pichetto signed the decree last week (11 October), saying: "Increasing our storage capacity is.
