

Solar with battery tender price in France 2026

Overview

France allocates 971 MWp in a heavily oversubscribed auction for ground-mounted PV, with another round due by year-end. France has awarded 971 MWp in its latest ground-mounted solar auction, a round that drew more bids than available capacity and kept average prices competitive.

France allocates 971 MWp in a heavily oversubscribed auction for ground-mounted PV, with another round due by year-end. France has awarded 971 MWp in its latest ground-mounted solar auction, a round that drew more bids than available capacity and kept average prices competitive.

France has awarded 971 MWp in its latest ground-mounted solar auction, a round that drew more bids than available capacity and kept average prices competitive. The energy regulator plans another 925-MWp tender before the end of 2025, sustaining momentum behind utility-scale PV as the grid readies.

The last three rounds of the PPE2 tender have all delivered an average power price of around €79/MWh. Image: Apex Energies. The French Ministry of Ecological Transition and Territorial Cohesion has awarded 971MW of ground-mount solar capacity, to 165 projects, in the eighth round of the second.

France's Energy Regulatory Commission (CRE) has released the specifications for a new tender for photovoltaic systems on buildings or roofs ranging from 100 kW to 500 kW. The “simplified tender,” known as AOS or PPE2 Petit PV Bâtiment, replaces the ongoing S21 tender scheme. Developers can submit.

France added 4.6 GW of new solar capacity in 2024, pushing its total to 22.1 GW. With ambitious targets set for 2030 and beyond, the country is ramping up ground-mounted and rooftop tenders, but faces critical headwinds in

permitting, land availability, and price volatility. This article outlines.

France concludes C&I rooftop PV tender with average price of €0.0982/kWh
The French authorities have concluded a commercial and industrial (C&I) rooftop PV tender with an average price of €0.0982 (\$0.1067)/kWh. The government allocated 220 MW of PV capacity in total. March 11, 2025
Gwénaëlle. What will France's next solar tender entail?

France is set to continue its solar momentum with the next tender round offering 925 MW, scheduled for December 2024. In addition to solar, the eighth PPE2 tender for onshore wind allocated 755 MW across 48 projects, achieving an average tariff of €87.92/MWh, consistent with the previous round.

How much solar power does France have in 2024?

In 2024 alone, the country added 4.6 GW of new solar capacity, bringing its cumulative total to 22.1 GW.¹ This growth shows no signs of slowing. According to SolarPower Europe, France's operational solar capacity could reach 52 GW by 2028, implying an additional 30 GW of installations over the next four years.²

How is France preparing for a solar project?

To meet these targets, France will rely heavily on structured tendering procedures. Beginning in the first half of 2025, the government plans to launch two annual tenders for ground-mounted solar projects, each awarding 1 GW of capacity. In parallel, three rooftop solar tenders per year are scheduled, with each round targeting approximately 300 MW.

What challenges are facing France's solar landscape?

With ambitious targets set for 2030 and beyond, the country is ramping up ground-mounted and rooftop tenders, but faces critical headwinds in permitting, land availability, and price volatility. This article outlines key policy shifts, market segmentation, tender outcomes, and systemic challenges shaping the French solar landscape.
