

## Successful bid price of PV energy storage project in Zambia 2026

## Overview

---

Zambia has officially signed a US\$100 million agreement for one of the largest standalone solar energy projects in Sub-Saharan Africa, outside South Africa—marking a major step in the country’s energy transition.

Zambia has officially signed a US\$100 million agreement for one of the largest standalone solar energy projects in Sub-Saharan Africa, outside South Africa—marking a major step in the country’s energy transition.

Zambia has officially signed a US\$100 million agreement for one of the largest standalone solar energy projects in Sub-Saharan Africa, outside South Africa—marking a major step in the country’s energy transition. The 100-megawatt (MW) Chisamba Solar Photovoltaic (PV) Project, led by the Kariba.

The grid-connected 100 MW Chisamba solar PV project, in Zambia, has secured \$71.5-million from financial services firm Stanbic Bank Zambia, with financing anchored by a 13-year power purchase agreement with GreenCo Power Services. GreenCo will supply the energy to copper mining company First.

The latest GET FiT tender in Zambia has awarded 120MW of capacity and set a record low price for Sub-Saharan Africa. The tender had originally been for 100MW but was extended, owing to the quality of the received bids. The lowest bid of 3.999 Us cents per kWh is the first under the four-cent mark.

Zambia is ramping up its renewable energy project pipeline – with at least two major solar projects set to be commissioned this year alongside smaller capacity facilities and another significant plant set for launch in 2026. The Zambia Electricity Supply Corporation (ZESCO) reported recently that.

The project, said to be the largest grid-connected solar facility in Zambia and the biggest of its kind in sub-Saharan Africa excepting South Africa, cost \$100 million and is now ready to be commissioned. Every day, we handpick the biggest stories, skip the noise, and bring you a fun digest you can.

With 40% of mines planning storage deployments by 2026 and solar panel prices dropping faster than Zambezi waterfall, Zambia could leapfrog from energy poverty to storage sophistication in record time. Final Thought (But No Conclusion, as Requested!) Next time you hear about energy storage in. How many solar PV IPP projects have been awarded in Zambia?

In April 2019, the Permanent Secretary of the Ministry of Energy announced the award of six (6) solar PV IPP projects, totalling 120MWac. The lowest successful bid came in at 3.999 USc/kWh and the weighted average of all six successful projects is 4.41 USc/kWh<sup>1</sup>. GET FiT Zambia Solar Awards are:.

How did KfW help Zambia develop a solar PV project?

With support from the German Cooperation provided through KfW, the government of Zambia sought experienced and qualified developers and investors with a track record in developing, financing, procuring, constructing and operating utility-scale solar PV for projects with an individual installed capacity of up to 20 MWac for a total of up to 100MW.

Does get fit Zambia offer concessional financing?

A truly competitive outcome. GET FiT Zambia has offered no form of grant financing, nor arranged for concessional financing. The tender also required developers to find and acquire their own suitable sites and pay for shallow grid connection, allowing for a truly competitive outcome of the tender.
