

Successful bid price of Solar Inverter project in Libya 2025

Overview

Will Libya's Sadada Solar Project Advance in 2025?

Libya's Sadada solar project is expected to advance in 2025, with preparations underway. Developed by energy major TotalEnergies in partnership with the General Electricity Company of Libya and the Renewable Energy Authority of Libya (REAOL), the project will have a capacity of 500 MW.

Will totalenergies build a solar project in Libya?

TotalEnergies is anticipated to commission its 500 MW Sadada project in 2025, a monumental solar project in Libya. The project is being built in partnership with the General Electricity Company of Libya. The Renewable Energy Authority of Libya also has a role to play in its delivery.

Will the Sadada project help Libya transition to renewables?

Once fully commissioned, the Sadada project is expected to play a key role in Libya's transition to renewables. Currently, 25% of Libya's electricity production depends on oil and gas. However, the country has immense solar potential that Dr. Elansari notes must be utilized.

How much oil does Libya have in 2024?

At the beginning of 2024, Libya held Africa's largest proved oil reserves, at 48 billion barrels, representing 41% of the continent's total reserves, according to the US Energy Information Administration. The North African country aims to diversify its energy mix by increasing its share of renewable sources, particularly solar.
