

Successful bid price of backup power battery project in Estonia 2025

Overview

The project, which came with a price tag of €19.6 million, was commissioned on February 1 only a few days before the desynchronization of the Baltic electricity system from the Russian grid.

The project, which came with a price tag of €19.6 million, was commissioned on February 1 only a few days before the desynchronization of the Baltic electricity system from the Russian grid.

The project, which came with a price tag of €19.6 million, was commissioned on February 1 only a few days before the desynchronization of the Baltic electricity system from the Russian grid. In similar moves, only a day before it began to unplug from Russia's electricity grid and join the EU's.

Eesti Energi has completed the procurement for its 26.5MW/51MWh BESS, the first of that scale in Estonia, with LG Energy Solution among the successful parties. The battery energy storage system (BESS) will be built at the Auvere industrial power plant complex in Ida-Viru county and will help.
