

Successful bid price of backup power battery project in Germany 2025

Overview

What is the forecast revenue for enervis Battery Storage Index in 2025?

The currently forecast revenue for 2025 as a whole is slightly lower than the average Enervis Battery Storage Index for 2024. With identical storage parameters, the forecast revenue for this year is EUR 134,000/MW/year. Mirko Schlossarczyk Managing Director of enervis energy advisors is an experienced energy market expert.

What is the market share of Bess batteries in 2023?

With a 72.3% market share, lithium-ion batteries dominate grid scale BESS applications and are set to remain the top choice for future needs. Germany led the European BESS market in 2023, with a 34% share, followed by Italy at 22% and the UK at 15%.

Could a German capacity market improve the bankability of Bess projects?

A German capacity market could further improve the bankability of BESS projects by providing contracted revenue streams. In countries like the UK and Italy, capacity markets have already proven valuable in supporting BESS financing by offering long-term, predictable income that complements merchant revenues.

Is energy arbitrage a viable revenue source for Bess projects?

Over the long term, energy arbitrage is expected to become the primary revenue source for BESS projects, as revenues from ancillary services decline with further BESS deployment – similar to trends observed in the UK. In this context, the depth and volatility of Germany's intraday market provide long-term revenue potential for BESS investors.

What are the key challenges facing battery storage?

It also outlines the key challenges facing the sector, including underdeveloped frameworks and barriers to investment. The study concludes with five policy

recommendations designed to accelerate battery storage deployment and ensure energy systems are prepared to integrate high levels of renewable energy.
