

Successful bid price of gel battery storage project in Guernsey 2025

Overview

An above-inflation price rise will allow Guernsey Electricity Ltd (GEL) to maintain the reliability and security of the island's electricity supply, according to the company's CEO.

An above-inflation price rise will allow Guernsey Electricity Ltd (GEL) to maintain the reliability and security of the island's electricity supply, according to the company's CEO.

An above-inflation price rise will allow Guernsey Electricity Ltd (GEL) to maintain the reliability and security of the island's electricity supply, according to the company's CEO. Last week GEL announced an 8% price rise, with the standing charge set to go from £68.25 to £86.75. Speaking to BBC.

Following GPEGs January 2022 publication entitled “States Trading Supervisory Board- with great power comes no accountability; the 10 year failure of Guernsey Electricity”, which characterised GEL as “being out of control” and the STSB/States of Guernsey “proving that they are incapable of running.

The report explores trends and forecasts across residential, commercial & industrial (C&I), and utility-scale battery segments, offering deep insights into Europe's energy storage landscape. With record growth in 2024 and new projections through 2029, the study highlights key market drivers.

◆◆the Board”) to make changes to its tariffs with effect from 1st July, 2025. Under a “revenue cap” approach, GEL proposed that individual elements of its tariffs should be adjusted by vary that is required as a result of the Electricity Strategy agreed by the States. The company is continuing to.

The States' Trading Supervisory Board (STSB) has given approval for Guernsey Electricity to increase its revenues by 8% from 1st July 2025. In determining its decision, the STSB commissioned an independent assurance review of the company's application and the financial models underpinning it. The.

BBC News. Guernsey An above-inflation price rise will allow Guernsey Electricity Ltd (GEL) to maintain the reliability and security of the island's electricity supply, according to the company's CEO. Last week GEL announced an 8% price rise, with the standing charge set to go from £68.25 to £86.75.

Why did Guernsey Electricity increase its tariff?

States-owned Guernsey Electricity Limited (GEL) announced last week its standing tariff will rise 8% from £68.25 to £86.75 per quarter from July. The States Trading Supervisory Board (STSB) said the increases are needed because it is not "commercially sustainable" for GEL to keep borrowing to cover infrastructure costs.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

Successful bid price of gel battery storage project in Guernsey 2025

Sustainable Battery Storage Projects - An Investment with a Future

Large-scale battery storage in Europe: How to invest in the energy transition with power storage. Sustainable, secure, future-oriented. Here's how it works.

Energy Storage Systems (ESS) Projects and Tenders

Content Owned by MINISTRY OF NEW AND RENEWABLE ENERGY Developed and hosted by National Informatics Centre, Ministry of Electronics & Information Technology, ...

Barbados opens second phase of battery storage project to ...

Barbados has launched the second phase of its Battery Energy Storage System (BESS) procurement process, a critical step in tackling ongoing grid congestion that has stalled ...

Battery energy storage in the NEM: Key trends in 2025

Energy Storage Summit Australia 2025 took

place in March. This article summarises a presentation on key trends for battery energy storage in the NEM.

Saudi Arabia issues RFP for 2,000 MW Battery ...

Saudi Power Procurement Company (SPPC) issued the Request for Proposals (RFP) to the Qualified Bidders for Group 1 Battery Energy Storage Systems (BESS).

Europe's renewables market powers battery storage ...

Europe's battery storage capacity is expected to grow around five-fold by 2030, bringing with it increasing returns for energy majors, project developers and traders, as the cost of new projects
