

## Successful bid price of household energy storage project in Malaysia 2026

## Overview

---

Will Malaysia's Bess capacity be fully operational by 2026?

The open bidding for 400MW/1,600MWh of BESS capacity, expected to be fully operational by 2026, represents a significant step in Malaysia's journey towards cleaner energy while addressing the energy trilemma of sustainability, affordability, and security.

How will Bess development impact Malaysia?

BESS development is expected to create new economic opportunities with an estimated investment value of RM2.8 billion. Petra expressed confidence that the initiative will strengthen the resilience and flexibility of Peninsular Malaysia's grid system, enabling it to accommodate greater capacity for renewable energy (RE) in electricity supply.

Why is Malaysia launching a Bess project?

The inaugural development of public BESS project in Malaysia is part of the Government's efforts to support the energy transition and achieve the goals of increasing the country's installed renewable energy capacity to 70% and to achieve net-zero by 2050.

Should foreign players participate in Bess projects in Malaysia?

Nevertheless, given that the development of BESS projects in Malaysia is still at an early stage, participation of foreign players with experiences in energy storage system projects may be crucial to support and encourage further projects of the same nature to be developed in the Malaysia energy market in the future.
