

Successful bid price of on grid solar storage project in Philippines 2025

Overview

Preliminary results from the fourth renewables auction in the Philippines show 9.4 GW in awarded solar, wind and storage projects, short of the 10.6 GW target, with remaining capacity in floating .

Preliminary results from the fourth renewables auction in the Philippines show 9.4 GW in awarded solar, wind and storage projects, short of the 10.6 GW target, with remaining capacity in floating .

Preliminary results from the fourth renewables auction in the Philippines show 9.4 GW in awarded solar, wind and storage projects, short of the 10.6 GW target, with remaining capacity in floating solar and solar-plus-storage to be reassigned to qualified bidders. The Philippines' fourth Green.

The Department of Energy (DOE) is pleased to announce the successful conduct of the 3rd Green Energy Auction (GEA-3) in the Philippines, with an offered capacity of 7,500 megawatts (MW), exceeding the installation target of 4,650 MW. This marks a significant step towards realizing the energy agenda.

On September 2, 2025, the fourth Green Energy Auction (GEA-4) organized by the Philippines' Department of Energy (DOE) concluded successfully, securing commitments for over 9,423 MW of new renewable energy capacity. This accounts for 88% of the 10,653 MW target set for this round. A total of 111.

The Energy Regulatory Commission (ERC) has released draft reserve prices for the fourth round of the Green Energy Auction Program (GEAP), marking the first time that solar-plus-storage projects will be included. The ERC pegged the preliminary Green Energy Auction Reserve (GEAR) prices at PHP 4.7679.

The GEA-4 included bids for ground-mounted, roof-mounted and floating solar, as well as onshore wind and integrated solar with energy storage systems (IRESS), with delivery scheduled from 2026 to 2029. Other major winners were Joy-Nostalg Solaris Inc., Envision Energy Philippines Corp. and Nortesol.

Preliminary data from the country's fourth Green Energy Auction (GEA-4)

indicates that while strong interest remains in solar and wind, the solar-plus-storage segment underperformed, leaving a portion of the targeted capacity unclaimed. According to figures released by the Department of Energy.
