Engineers, policymakers, and investors—all hungry for insights into a market that's hotter than a Yazd afternoon.

Rumor has it Iran's Energy Ministry is testing drone-delivered batteries for remote villages. Meanwhile, a pilot project in Kerman uses refurbished camel caravans (yes, camels) to transport small-scale storage units to off-grid areas. Because sometimes, the future looks suspiciously like the past.

August 18, 2025 – SUNROVER has dramatically accelerated its solar-plus-storage footprint in Iran, landing its elite operations and engineering team in Iran on August 16th. Demonstrating unwavering commitment, the team initiated critical customer engagements within hours of arrival, diving deep into.

The Iranian Energy Ministry aims to install a total of 550,000 rooftop solar units as part of its push to expand the renewable capacity in the country. Deputy Energy Minister Mahmoud Kamani said on Monday that the government hopes the number of rooftop solar units in the country will increase to.

The Iranian government has unveiled a sweeping energy transition initiative to decouple all state institutions from the national power grid, prioritizing off-grid photovoltaic (PV) systems to tackle chronic electricity shortages and accelerate renewable energy adoption. Facing recurring.

Iran has recently secured significant financing from China to support the construction of a massive solar power plant project with a total capacity of 1,758 megawatts (MW). This initiative is a critical part of Iran's strategy to enhance its renewable energy infrastructure and reduce its reliance.
