

Successful bid price of standalone energy storage project in Belgium 2026

Overview

Work started in October, and the project in La Louvière is scheduled to be operational by summer 2026 and will require an investment of around €70 million (US\$72 million). How much battery storage capacity does Engie have in Europe?

ENGIE reaches 500 MW of battery storage capacity in Europe, either installed, under construction or under development. ENGIE's BESS project for installed capacity of 100 MW has been selected in the 4th Capacity Remuneration Mechanism (CRM) auction in Belgium.

Why is Belgium a good place to invest in a battery?

Other factors that make Belgium an appealing location for battery investments are the exemption of TSO grid fees and high revenues from balancing market (mainly FCR and aFRR)," Simon De Clercq, senior research associate at Aurora Energy Research, told ESS News.

Is ESG financing a Bess project?

In concurrent news, independent power producer (IPP) Energy Solutions Group (ESG) has completed financing and launched construction on its first large-scale BESS project in Harmignies, in the Wallonia region of Belgium. The news was announced by law firm Loyens & Loeff, which advised ESG on the financing.

How many MW of Bess was contracted in 2025-2026?

Elia announced that the goal had been achieved for the 2025-2026 delivery year: "security of supply is guaranteed, and sufficient volume has been contracted". A total of 100 MW of BESS was contracted in this procurement exercise.
