

The original fixed energy storage device is locked

Overview

To repair an Energy Transfer Terminal, you must use the Terminal's Viewfinder to collect and transfer energy from either a Fixed Storage Device or an Energy Transfer Device.

To repair an Energy Transfer Terminal, you must use the Terminal's Viewfinder to collect and transfer energy from either a Fixed Storage Device or an Energy Transfer Device.

Fixed Storage Devices are energy storage units that are commonly seen near Energy Transfer Terminals and allow energy to be transferred from storage devices to them. They can easily be classified due to how their bases are fixed to the ground. Unlike the Fixed Storage Device, these can be picked up.

These devices can be used to activate certain mechanics such as locked doors/gates and Stabilizers. Storage devices can provide energy to Transfer and Research Terminals. Pick up a portable storage device and put it next to a terminal that has stopped functioning to return it to normal operation.

Follow the steps below to complete this logistically-confusing puzzle. Genshin Impact's An Eye for an Eye World Quest, which falls under the Unfinished Comedy quest series, involves helping two prisoners make a daring escape from the Fortress of Meropide. After finding the Geode Mine Shaft, you.

In this guide, we will tell you how to get an energy storage device and unlock the research terminal in Genshin Impact. When we did the quest, this subtask took a few minutes to complete. To complete the task as quickly as we did, follow the instructions below. As we mentioned above, this task will.

Energy Transfer Terminals are puzzle devices that look like research terminals located in the new areas of Version 4.1. Most of these terminals have ceased to operate; in order to restore them to normal operation, you must collect and transfer energy from various storage devices. Solving these.
