

Total investment cost of backup power battery project in Mauritius

Overview

Of the total cost of the project (\$10 million), \$7.5 million was funded by the UNDP Green Climate Fund. The system was installed by Siemens France.

Of the total cost of the project (\$10 million), \$7.5 million was funded by the UNDP Green Climate Fund. The system was installed by Siemens France.

Of the total cost of the project (\$10 million), \$7.5 million was funded by the UNDP Green Climate Fund. The system was installed by Siemens France. The finance minister also announced plans to increase the capacity of the solar PV farm at Henrietta, situated in the central western part of.

The 2030 Renewable Energy Roadmap provides for an estimated investment of USD 1.35 billion in the sector by horizon 2030, encompassing generation from solar and floating solar, wind, biomass, hybrid renewable systems as well as marine renewables, among others. During the past few years, over 120 MW.

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage fluctuations in renewable energy sources like solar and wind. BESS plays a critical role in stabilising the grid and increasing the share of Variable Renewable Energy.

A project shall be considered under the Premium Investor Scheme if - •It entails a minimum investment of Rs 500 million rupees in - o emerging sectors; o pioneering industries and first movers; o innovative technologies and industries; or o such targeted economic activities as the Minister may .

Bambous, March 1, 2023 – Qair, an independent renewable energy producer, announces the signature with the Central Electricity Board (CEB) of four power purchase agreements for Renewable Energy from Solar PV and Battery Storage (BESS) Hybrid Facilities. This investment, worth more than Rs 7 billion.

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a

significant stride towards its ambitious goal of achieving 60% renewable energy in the electricity mix by 2030. Grid-Scale Battery Energy Storage System (2MW) at. Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

Does Qair Group operate solar energy farms in Mauritius?

Qair Group already operates three solar PV and wind energy farms in Mauritius with a combined capacity of 35 MW. The group founded by Jean-Marc Bouchet has a combined renewable energy capacity of 860 MW operational in Africa, South-East Asia, South America, and Europe.

Why should you invest in Mauritius?

- Mauritius, as an integral part of the African Continent has excellent bilateral ties with African Countries.
- Moreover, the local expertise of Mauritius in the energy sector coupled with the offering of its International Financial Centre can be leveraged upon for structuring and management of energy projects in Africa.

What is the Smart Grid Roadmap for Mauritius?

The Smart Grid Roadmap for Mauritius was launched in December 2018 to help the CEB integrate new technologies in the power system, enhancing reliability, safety, and security.
