

## Total investment cost of grid tied storage system project in Cyprus

## Overview

---

The EU and Cyprus agreed in 2023 that a total of €1 billion would be invested in the country between 2021 and 2027 through the JTF.

The EU and Cyprus agreed in 2023 that a total of €1 billion would be invested in the country between 2021 and 2027 through the JTF.

The government is considering allocating approximately €30 million to the Electricity Authority (EAC) to strengthen electricity storage systems at three EAC substations, sources told Phileleftheros. Under legislation approved several weeks ago, the independent Cyprus Transmission System Operator.

The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of energy storage. The Ministry of Energy, Trade and Industry for the Mediterranean island state in southern Europe published its guide (7 February) for the scheme after the.

The Scheme includes calls for proposals for EU grants targeting hybrid energy systems (combining renewable energy and storage installations) under the Just Transition Mechanism (JTM), Pillar I Just Transition Fund (JTF). The regulatory framework for this EU Funding Programme is set out in.

Cyprus has introduced its first-ever energy storage subsidy scheme concerning large-scale renewable energy plants. The subsidy scheme runs until 2027, at which time the ministry will be running open calls for bids. Cyprus has introduced its first-ever energy storage subsidy scheme for large-scale.

Cyprus will install its first large-scale energy storage system within 16 months to integrate renewables, stabilize the grid, and reduce electricity prices.
