

## Total investment cost of hybrid solar inverter project in Luxembourg

## Overview

---

Estimated cost: For a 6 kWp installation, the total cost is approximately 13,900 euros, including panels, inverter, additional equipment and installation. Return on investment: Thanks to financial aid and savings on the electricity bill, profitability is generally achieved in 6 to 8.

Estimated cost: For a 6 kWp installation, the total cost is approximately 13,900 euros, including panels, inverter, additional equipment and installation. Return on investment: Thanks to financial aid and savings on the electricity bill, profitability is generally achieved in 6 to 8.

The investment cost includes the cost of purchasing the photovoltaic panels or hybrid solar collectors, the fixing rails, the electrical wiring directly linked to the installation, the inverter, the electrical protections and the two-way meter as well as the costs specific to these eligible items.

In this article, we break down the typical costs involved in hybrid inverter installation and explain how innovative companies like Sigenergy, specializing in cutting-edge energy solutions, provide high-quality products and services backed by the latest power electronics, digital technologies, and.

It is generally necessary to count between €2,100 and €2,300 per kWp (kilowatt-peak or peak power) of photovoltaic cells (taking into account the total cost: supports, fixing, panels, inverters, etc). For a standard 5 kWp roof in Luxembourg, the total cost excluding grants is between €10,750 and.

This program offers a subsidy covering up to 50% of installation costs for self-use systems, with a threshold of 1,250 euros per kWp installed. For installations with total injection, the aid is 20% of the costs, capped at 500 euros per kWc. This aid is available for installations invoiced between.

The cost of all the projects is estimated at €44 million. This is slightly less than three times the amount declared. It is not yet clear how the compensation will be distributed. But the industry has a proposal. Photovoltaics are not only environmentally friendly. It can also free large consumers.

Following a call for projects launched in October 2022, 85 solar power plant projects by 75 Luxembourg companies qualified for public funding. These projects will receive a total investment aid of €16.1 million. Some of the selected companies received support from Luxinnovation. The results of the.
