

Total investment cost of lithium solar battery project in Argentina

Overview

The total investment cost is about 830 million dollars (about KRW 0.95 trillion) including infrastructure investment and operating funds. Operation of the lithium plant and financing will be 100% carried out by POSCO Argentina, a subsidiary of POSCO Holdings.

The total investment cost is about 830 million dollars (about KRW 0.95 trillion) including infrastructure investment and operating funds. Operation of the lithium plant and financing will be 100% carried out by POSCO Argentina, a subsidiary of POSCO Holdings.

The total investment cost is about 830 million dollars (about KRW 0.95 trillion) including infrastructure investment and operating funds. Operation of the lithium plant and financing will be 100% carried out by POSCO Argentina, a subsidiary of POSCO Holdings. POSCO Group plans to increase mass.

Rio Tinto Group has announced a major \$2.5 billion investment to expand its Rincon lithium project in Argentina. This move aligns with President Javier Milei's push to deregulate the country's economy and attract foreign investment. As demand for lithium continues to soar, this expansion positions.

In December 2024, we announced our investment of US\$2.5 billion to expand Rincon, representing our first commercial scale lithium operation. Rincon's capacity of 60,000 tonnes of battery grade lithium carbonate per year is comprised of the 3,000-tonne starter plant and 57,000-tonne expansion plant.

Argentina's lithium industry is poised for unprecedented growth, with official targets projecting a 75% production increase to 130,800 tonnes of lithium carbonate equivalent (LCE) by 2025. This ambitious expansion, driven by new projects in Salta and scaled operations in Catamarca and Jujuy.

Rio Tinto has approved a \$2.5 billion investment to expand the Rincon lithium project in Argentina, marking the company's first large-scale lithium operation and reinforcing its commitment to building a leading battery materials portfolio. The expanded Rincon project will have an annual capacity of.

Rincon Lithium sold for a whopping \$825 million. LSC Lithium Corporation had a transaction value of \$962 million. Arena Minerals was acquired for \$227 million. Neo Lithium changed hands for \$737 million. Millennial Lithium was sold for \$460 million. Lithium Chile at \$101 million. Lake Resources. Who owns a lithium plant in Argentina?

Both projects are expanding their production capacity. The Cauchari-Olaroz plant is the latest to start production in Argentina. It is controlled by Minera Exar, a partnership between Ganfeng Lithium, which holds the majority stake, Canadian company Lithium Americas, and JEMSE.

How much lithium is produced in Argentina?

Total lithium production of 2.8 million tons. Reserves increased six times and price rose five times compared to 2018, the year of acquisition POSCO Holdings has started construction of a lithium commercialization plant in Argentina.

What factors limit lithium industrialization in Argentina?

Domestic and global factors limit lithium industrialization in Argentina. Argentina faces the challenge of defining strategic planning for the lithium sector. Latin American countries, rich in key transition materials, have emerged as significant suppliers for China and key destinations for Chinese investment.

Is Rio Tinto a potential lithium powerhouse?

Potential challenges include cost overruns, delays in ramp-up, and technological hurdles. Despite these concerns, Rio Tinto remains confident in its ability to deliver on its commitments. The Rincon investment underscores Argentina's potential as a global lithium powerhouse.

How many tonnes of lithium carbonate can Rincon produce a year?

Rincon's capacity of 60,000 tonnes of battery grade lithium carbonate per year is comprised of the 3,000-tonne starter plant and 57,000-tonne expansion plant. The project consists of brine extraction using a production wellfield, processing and waste facilities, as well as associated infrastructure.

What is the Rincon Lithium Project?

The Rincon Lithium Project – a large, low-cost lithium-brine asset located in

the heart of the 'lithium triangle' in Argentina – will be a valuable source of rapidly produced, high-quality lithium for the global energy transition.
