

Wall mounted battery capital expenditure estimate 2026

Overview

Is battery replacement a capital expenditure?

Hi Rohit, Replacement of a battery does not 'increase' the useful life of the asset, it just maintains the existing useful life. Therefore this is not regarded as capital expenditure, and hence cannot be capitalized as a part of the asset. This is the treatment under existing AS 10. Under Ind-AS 16 however, component approach is applicable.

Are battery storage costs based on long-term planning models?

Battery storage costs have evolved rapidly over the past several years, necessitating an update to storage cost projections used in long-term planning models and other activities. This work documents the development of these projections, which are based on recent publications of storage costs.

Do projected cost reductions for battery storage vary over time?

The suite of publications demonstrates wide variation in projected cost reductions for battery storage over time. Figure ES-1 shows the suite of projected cost reductions (on a normalized basis) collected from the literature (shown in gray) as well as the low, mid, and high cost projections developed in this work (shown in black).

When will battery cost projections be updated?

In 2019, battery cost projections were updated based on publications that focused on utility-scale battery systems (Cole and Frazier 2019), with updates published in 2020 (Cole and Frazier 2020) and 2021 (Cole, Frazier, and Augustine 2021). There was no update published in 2022.

What is a good round-trip efficiency for battery storage?

The round-trip efficiency is chosen to be 85%, which is well aligned with published values. Battery storage costs have evolved rapidly over the past several years, necessitating an update to storage cost projections used in long-

term planning models and other activities.
