Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

How long does a power station last?

Exactly how long depends on the amount of watts the devices connected to the power station draw. You can roughly estimate how long a power station will last by dividing the amount of watts devices are drawing from it by its watt hours. Keep in mind that the usable watt hours are not the same as the watt hours listed on the power station's label.
