Grenada derives almost all of its energy from imported hydrocarbons. In 2020, non-renewables accounted for roughly 98% of installed capacity and electricity generation, with solar energy making up the difference. [1] The government of Grenada has expressed concerns about climate change, but.

The data and information that are available in the ERC were mostly provided by the government ministries, agencies, and departments, that have responsibility for statistics and planning, in general, and the energy sector and electricity subsector including the electric utilities, in particular. The. How much energy can Grenada generate?

According to estimates from the United States' National Renewable Energy Laboratory, Grenada could eventually generate up to 20 MW from wind, 25 to 50 MW from solar, and more than 50 MW from geothermal energy.

What are the major industries in Grenada?

Manufacturing industries in Grenada operate mostly on a small scale, including production of beverages and other foodstuffs, textiles, and the assembly of electronic components for export. Economic growth picked up in the late 1990s following slow growth and domestic fiscal adjustment in the early years of the decade.
