

Wholesale domestic energy storage price list in Czech

Overview

Is lighting a good investment in the Czech Republic?

Moving forward, the Czech Republic is poised to continue evolving its energy sector to meet contemporary challenges and opportunities. Lighting is not the thing that uses the most electricity, but it can still be a good investment to switch to energy-efficient and LED lights.

What incentives are there for onsite generation in the Czech Republic?

At the same time, stakeholder and regulatory pressure encouraged Czech organisations to invest in renewable power. There are several EU incentives to spur the growth of onsite generation. For example, the Modernisation Fund supports investments in energy efficiency, storage, network upgrades and the re-skilling of workers.

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.
