

Wholesale school solar storage price list in Singapore

Overview

Should you store surplus energy in a solar storage system?

Storing surplus energy in a solar storage system comes with a trade-off—you miss out on valuable financial incentives like the Simplified Credit Treatment (SCT) Scheme and the Enhanced Central Intermediary Scheme (ECIS). These programs enable you to sell any excess energy generated by your solar panel system back to the grid in Singapore.

Should you buy a solar storage system?

If so, a solar storage system might be the next logical step for you. Solar batteries are fantastic for storing the energy generated by your solar panel system independently from the grid. And here's the exciting part: they can be a perfect match for a non-standard price plan.

How much does a solar system cost?

Upfront costs: Expect to pay S\$15,000–S\$50,000 for a solar system, depending on size. Break-even point: Most homeowners recover their investment in 5 to 7 years through electricity savings. Low maintenance: Solar panels require minimal upkeep and typically last 25–30 years.
